

Final submission using PDF eXpress

After proofreading and checking your paper with IEEE PDF eXpress, it must be submitted on the ICRA 2006 web site electronically using the **PDF format**.

ICRA 2006 has registered for use of a new IEEE tool: IEEE PDF eXpress. IEEE PDF eXpress is a free service to IEEE conferences that allows their authors to make IEEE Xplore-compatible PDFs (Conversion Function) or to check PDFs that authors have made themselves for IEEE eXpress compatibility (PDF Check function). *Prior to* submitting your camera-ready paper to the conference web site, please check acceptability of your paper at IEEE PDF eXpress as described in detail below. You **NEED** to submit the compliance email along with your paper.

Steps for submission:

- 1) Create manuscript(s),
- 2) Proofread and check layout of manuscript,
- 3) Create IEEE PDF eXpress account,
- 4) Upload source file(s) for Conversion; and/or PDF(s) for Checking,
- 5) Use IEEE PDF eXpress to attain IEEE Xplore-compatible PDF(s). The site contains extensive instructions, resources, helpful hints, and access to technical support,
- 6) Submit final, IEEE Xplore-compatible PDF(s) per the format instructions.

To access IEEE PDF eXpress, go to:

<http://216.228.1.34/pdfexpress/log.asp>

Conference ID is: **icra06**

Detailed instructions for accessing and using the PDF eXpress site are, as follows:

1. Access the IEEE PDF eXpress site using the information above.

First-time users:

- a. Click “New Users – Click Here”.
- b. Enter **icra06** for the Conference ID, your e-mail address, and choose a new password. Continue to enter information as prompted.
- c. You will receive online and e-mail confirmation of successful account setup.

Previous users, but using it for the first time for a new conference:

- a. Enter **icra06** for the Conference ID, your e-mail address, and enter the password you used for your old account.

When you click “Login”, you’ll receive an error saying you need to set up an account. Simply click “Continue”. By entering your previously

- b. used e-mail address and password combination, you will enable your old account for access to this new conference.
- c. Check that the contact information is still valid, and click “Submit”.
- d. You will receive online and e-mail confirmation of successful account setup.

Returning users:

- a. Enter **icra06** for the Conference ID, e-mail address and password.
2. For each conference paper, click “Create New Title”.
3. Enter identifying text for paper (title is recommended but not required).

4. Click “Submit PDF for Checking” or Submit Source Files for Conversion”.
5. Indicate platform, source file type (if applicable), click Browse and navigate to file, and click “Upload File”. You will receive online and e-mail confirmation of successful upload.
6. You will receive an e-mail with your Checked PDF or IEEE PDF eXpress-converted PDF attached. If you submitted a PDF for Checking, the e-mail will show if your file passed or failed. You eventually need to submit this email as a text file along with your paper.

If the PDF submitted fails the PDF check:

- a. Submit your source file for conversion by clicking **Try Again**, the **Submit Source Files for Conversion**, or
- b. Read the PDF Check report, then click “The PDF Check Report” in the sidebar to get information on possible solutions, or
- c. “Request Technical Help” through your account.

If you are not satisfied with the IEEE PDF eXpress-converted PDF:

- a. Resubmit your source file with corrections (**Try Again**, then **Submit Source Files for Conversion**), or
- b. Submit a PDF by clicking **Try Again**, then **Submit PDF for Checking**, or
- c. “Request a Manual Conversion” through your account.

If the PDF submitted passed the PDF Check, or you are satisfied with your IEEE PDF eXpress-converted PDF:

- a. Submit your IEEE Xplore-compatible PDF to the IEEE ICRA 2006 conference site.

IEEE PDF eXpress converts the following file types to PDF:

Rich Text Format

Freelance

(La)TeX (DVI and all support files required)*

Pagemaker

Framemaker

QuarkXpress*

Word Pro

Microsoft Word

Wordperfect

*For documents created in formats that do not embed source files, include all support files with the final manuscript in a folder. Put this folder in a compressed archive for submission. If it is possible to embed images in the source document, you should do so to avoid potential issues, such as missing graphics.

IMPORTANT: A DVI (DeVice Independent file) is required for LaTeX conversions, in addition to the associated image files. Make sure that your LaTeX system can output a DVI, otherwise it cannot be converted. Be sure also to check that your images are properly referenced, and that DVI can handle the image file types used (DVI does not handle some newer image types, such as *.png). Finally, any camera-ready papers generated by your LaTeX system **MUST** conform to the format and criteria specified in this MS Word template or risk being excluded from the Proceedings/CD-ROM.

Do not send hard copies or use other file formats – they will not be accepted. Proper usage of the English language is expected of all camera-ready papers submitted. Make sure that the PDF file looks fine on the screen as well as in print.

In order to **build the indices for the DVD-ROM**, we need the **title and author information** for your paper entered into the PDF file.

- In Acrobat, select the menu option **File → Document Properties → Summary** and then fill in your paper title and author information.
- In MS Word, select the menu option **File→Properties**, and then fill in the dialog box with your paper's title and author information.

Please use only the standard fonts that come with the system and standard font encoding schemes. In all cases, ***please make sure that the fonts are fully embedded into the PDF file.*** Fonts that require non-English language support are not allowed. ***If you create your file on an operating system running a language other than English, please make sure that your file can be opened correctly on all computers.*** Missing fonts and different font encoding schemes are the main reasons for PDF read errors in Acrobat. To allow us to add the final page numbers the **document should not have any password protection.**

If creating your PDF using Acrobat, make sure to use “File | Save As” rather than “Save”. This will ensure that the resulting PDF is more compact and ensure the integrity of the PDF file. IEEE requires that your PDF be saved in PDF 1.3 so that they can be opened by Acrobat Readers 4 and later. Again no file security or password protection is to be set on any files. All fonts must be accurately included in the PDF file as an “Embedded Subset”. Set the media or page size to Letter (Pages) so they are set for 8.5 by 11 inches (21.54 by 27.94 centimeters) and not A4.

For IEEE requirements on the PDF files, see http://www.ieee.org/portal/cms_docs/pubs/confstandards/pdfs/IEEE-PDF-SpecV32.pdf.

Failure to follow the above guidelines may result in a submission being excluded from publication in the conference proceedings and DVD-ROM.
